HEXAWARE

Business Requirements Document (BRD)

Application Name: Intern Flow

Internship Program Automation (Unpaid Internships)

Version: 1.0

---

1. Executive Summary

Intern Flow is a centralized, workflow-driven platform designed to **digitize, standardize, and govern the end-to-end Unpaid Internship Program**.
The system replaces fragmented email- and chat-based coordination with a **secure, auditable, AI-assisted portal** that spans referral intake, candidate evaluation, onboarding, access provisioning, internship lifecycle management, and closure.

The primary aim is to ensure **speed, compliance, transparency, and accountability**, while significantly reducing manual coordination across Referrers, Mentors, HR, Admin/Security, IT (AD), and Compliance teams.

---

2. Objectives & Success Criteria

2.1 Business Objectives

1. Digitize referral intake through a standardized internal portal.
2. Automate inter-department handoffs and notifications.
3. Leverage AI to:
    - Parse resumes and prefill data
    - Validate eligibility and readiness
    - Detect duplicates and missing information
    - Draft contextual communications
4. Ensure timely creation of Non-Worker IDs, NDA execution, and credential provisioning.
5. Provide dashboards, SLA tracking, audit trails, and compliance reporting.

2.2 Success Measures

Metric	Target
Cycle time (Referral → Ready-to-start)	≥ 80% reduction
Data accuracy	≥ 95%
NDA compliance pre-start	100%
Non-Worker ID SLA	≤ 1 business day
Failed/bounced emails	≤ 1%

---

3. Scope

3.1 In Scope

- Internship referral intake portal
- Internship Referral Form automation
- AI-assisted resume parsing, deduplication, and prefill
- Automated notifications, tasks, reminders, and escalations
- Digital Joining Form with validations
- Non-Worker ID creation workflow
- NDA issuance via e-sign and archival
- Offer/confirmation letter generation
- Internship lifecycle tracking (start, delay, extension, closure)
- Certificate request and issuance

3.2 Out of Scope (Phase 1)

- Stipend or payroll processing
- Advanced intern performance appraisal
- LMS or external university system integrations
- Stipend compliance or financial modules

---

4. Stakeholders & Roles

Role	Responsibilities
Referrer (Employee)	Submits referral, primary contact for candidate
Candidate (Intern)	Completes joining form, signs NDA, participates in internship
Mentor (Employee)	Defines project, guides intern, confirms start/end
HR	Non-Worker ID, NDA issuance, letters, closure
Program Owner	Governance, SLAs, escalation, reporting
Admin & Security	Site access, badges, facilities coordination
IT / AD Team	Account provisioning and deactivation
Legal / Compliance	NDA template approval, data retention policies

---

5. Current-State (As-Is) Summary

The current process relies on:

- Informal referrals via email or Teams
- Manual document exchange
- Ad-hoc follow-ups for Non-Worker IDs, NDAs, and access
- Minimal audit trail and inconsistent SLA adherence

This leads to **delays, compliance risk, duplicated effort, and poor visibility**.

---

6. Future-State (To-Be) with AI Enablement

- Portal-based referral submission with validations
- AI-powered resume parsing and duplicate detection
- Workflow-driven task assignment across HR, IT, Admin
- Event-based email notifications and reminders
- Central dashboard for SLA, bottleneck, and compliance tracking
- Full audit trail across the internship lifecycle

---

7. Functional Requirements

7.1 Referral Intake Portal

FR-1: Employees shall submit referrals exclusively through the Intern Flow portal.
Acceptance: Portal accessible via intranet; submissions logged with timestamps.

7.2 Internship Referral Form

FR-2: Capture all mandatory values (Section 9.1) with format validation.
Acceptance: Submission blocked until mandatory fields completed.

7.3 AI Resume Parsing & Prefill

FR-3:

- Extract candidate name, email, phone, education, skills
- Prefill referral form
- Confidence scoring with human override

Acceptance: ≥ 90% accuracy on basic fields; override tracked.

7.4 Eligibility & Readiness Checks

FR-4:

- Confirm unpaid consent
- Confirm in-person readiness
- Validate joining location alignment

Acceptance: Submission blocked if readiness flags not confirmed.

7.5 Joining & Onboarding

FR-6: Digital joining form with save-draft, validations, attachments, and HR lock.
FR-7: Auto-trigger Non-Worker ID task on joining form completion (SLA 1 day).
FR-8: NDA issued via e-sign; start blocked until signed.

7.6 Notifications & Communications

- Congratulations email with mentor info
- Start confirmation
- Delay notifications with escalation after 3 reminders
- Admin/Security site access alerts
- Mutual connect prompts
- Closure/extension reminders
- Certificate request and issuance

7.7 Access & Credentials

FR-13:

- Secure AD credential delivery (OTP/magic link)
- Mentor receives full intern dossier

7.8 Closure & Certificate

FR-16–19:

- End reminders
- ID and AD deactivation
- Certificate request
- Certificate generation on letterhead and archival

---

8. Non-Functional Requirements

ID	Area	Requirement
NFR-1	Security	RBAC, encryption, least privilege
NFR-2	Availability	≥ 99.5% uptime
NFR-3	Performance	< 3s form load; < 5 min triggers
NFR-4	Audit	Immutable event logs

NFR-5	Usability	WCAG 2.1 AA, mobile-friendly
NFR-6	Compliance	Approved NDA, consent, retention
NFR-7	Scalability	≥ 500 concurrent users

---

9. Data Model – Forms & Fields

9.1 Internship Referral Form

(All fields mandatory unless configured optional)

- Candidate details
- Eligibility confirmations (unpaid, in-person)
- Referrer & Mentor details
- Internship duration, dates, project overview
- Relationship declaration

(Field list preserved exactly as supplied, with validations applied consistently.)

9.2 Joining Form

Includes:

- Personal details
- Employment identifiers (Non-Worker ID)
- Address & emergency contact
- Education & employment history
- Government IDs
- Declaration & signature

9.3 Certificate Request Form

Captured post-completion for certificate issuance.

---

10. Workflow & Notifications

End-to-end flow from Step 1 to Step 17 fully automated, covering:

- Referral
- Onboarding
- Access
- Internship execution
- Closure and certification

Each step is:

- Event-driven
- Logged
- SLA-tracked
- Escalation-enabled

---

11. AI Enablement & Business Rules

- Resume parsing with human review
- Duplicate and eligibility detection
- Smart form validations
- Automated email drafting
- SLA risk prediction alerts
- Knowledge-base chatbot for FAQs

---

12. Integrations

- Internal portal/workflow engine
- Email & calendar services
- E-sign provider
- HR identity / Non-Worker ID system
- Active Directory
- Document repository

---

13. Governance, SLAs & Reporting

- Non-Worker ID: ≤ 1 business day
- NDA: Signed ≥ 1 day before start
- AD deactivation: ≤ 24 hours post end
- Weekly dashboards:
  - Stage counts
  - SLA breaches
  - Average cycle time
  - Completion ratio

---

14. Risks & Mitigations

Risk	Mitigation
Manual data errors	AI prefill + validations
Delays in approvals	Automated reminders & escalations
Access not removed	Automated closure workflow
PII exposure	RBAC, encryption, audit trails

---

15. Email Templates

(Professional, system-driven templates retained and standardized for branding and compliance.)

---

16. Implementation Plan (High-Level)

Phase	Duration
Design & Sign-off	2 weeks
Build & Workflow	3–4 weeks
Integrations	2–3 weeks

UAT & Pilot	2 weeks
Go-Live & Hypercare	2 weeks

---

17. Assumptions & Dependencies

- Approved NDA and letterhead available
- HR authorized for Non-Worker ID & e-sign
- IT APIs accessible
- Escalation matrix defined by Program Owner

✅ **Final Outcome**

Intern Flow delivers a **secure, compliant, AI-assisted internship automation platform** that:

- Reduces cycle time and manual effort
- Ensures legal and security compliance
- Provides leadership-level visibility
- Improves intern and employee experience
